> Hi, I'm Julien! I love to architect and manage the successful development of software which helps solve meaningful issues.

Relevant Experience

2017 - Present
Front End Team Leader & Task Force Technical Leader
Healthy.io

- Leading a team of six front end engineers building Healthy.io's clinician-facing portals, marketing websites and back office platforms.
- Providing technical and architectural guidance in the development of these apps using React as the foundation.
- Managing the hiring process for front end engineers and guiding their growth.
- Providing technical, architectural and agile leadership for a second (cross-disciplinary) team building the company's infrastructure platform.
- Collaborating with all departments to serve their needs and ensure the platform enables scalable growth.

2015 - 2017
Full Stack Developer
monday.com

- Developed a few of monday.com's largest features, including its account admin, team management system, and the Gantt-like Timeline.
- Rebuilt from scratch monday.com's homepage using a static site generator and placing emphasis on performance, responsiveness, modularity, and SEO.

2012 - 2015
Full Stack Developer
Signals Analytics

- Served as technical adviser on new projects, defining methods for data collection, transformation, and analysis.
- Designed and developed a BI-reporting tool and interactive data visualization sites for Fortune 500 clients.

2011 - 2012
Full Stack Developer
Waste To Watts

- Developed a platform to store and display data in real-time about the health of the power grid in India.
